Hi Angela and Dan

Below and attached are materials from the PPA meeting – the annotated agenda includes Marie’s interest in talking about possible changes to funding structure

From agenda:

“Groundwater PPA: changes to funding structure

EPA desired outcome – **Non-responsive** listed in the PPA and re-establish contacts.”

And below are our follow up notes – not a lot there, but provides the reference for you.

- Peter - Set up a follow-up meeting with EPA/Ecy 319 and NEP to discuss **Non-responsive** issue that Melissa raised. (DONE last week – tho follow up and follow through needed and Peter is on it..)
- Peter – Set up a follow-up meeting with Heather on Puget Sound re Orca recommendations. (Ongoing for sure)
- **Marie – Set up a follow-up meeting to discuss groundwater PPA tasks and funding changes.**
- Next annual progress meeting – provide feedback to Michelle on any suggestions you may have on frequency and format (e.g., all hands overview and then breakouts?). Some EPA managers told me after the meeting that they prefer Idaho’s format. Note any changes will need to be supported by Ecology.
